• New molded tailgate surface creates a custom installation

• Easily removed and mounted onto your truck

• Powder and e-coated to automotive standards

• 2"x19"x58"

• 500 lb rated

F.A.Q.

Q? Where is this product made?

A. The LivingStep is constructed in the USA to automotive standards.

Q? What is the product made of?

A. The step is constructed of steel. It is "E" coated (a process used in automobile parts to keep them from rusting on the insides) as well as "powder" coated (a crinkle coat applied on top to give further protection from wear and tear). The plastic molding provided with the TGS-11 Surface Mount is blown of High Density Polyethylene. This mold has a textured finish making it slip resistant as well as providing two convenient cup holders.

Q? How many moving parts does it have?

A. ONE, the hinge is its only moving part. The hinge is constructed from hardened stainless steel and will not rust. It is not affected by conditions such as sand, snow, or ice.

Q? For the Drop In model, will the cut in weaken my tailgate?

A. No, the step is engineered to replace the stability removed by cutting into the gate.

Q? Is the LivingStep compatible with truck bed covers, such as the Tonneau, and truck caps?

A. Yes, it is compatible with most truck bed covers and truck caps, as well as bed liners. If in question, please check with manufacturer.

Q? Is the LivingStep guaranteed?

A. It comes with a 5-year manufacturer's warranty.

Q? Will it fit any truck?

A. It will fit any full sized pickup truck, including Ford, Dodge, GMC, Toyota and Nissan. Some Chevy Avalanches have a thin skin with a tapered cover, which will not accommodate the step.

Q? Is it heavy?

A. The TGS-11 Surface Mount weighs 28 lbs. TGS-12 Drop In weighs 18lbs.

Q? What happens if it gets rained on? Ice? Sand? Mud?

A. The functionality of the Livingstep is NOT affected by weather conditions.

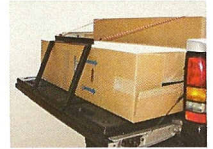

Q? Can it be used as a bed extender?

A. Yes. It turns a 6' bed into an 8' bed. Simply close step over load and strap down using the installed holes to hook bungee cords from step to bed anchors.

LivingStep

TGS-12 Drop-In Model

• Dealer installed model drops into your existing tailgate in about 2 hours

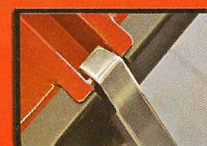

• Closes flush with your existing tailgate

• Powder and e-coated to automotive standards

• 19"x24"

• Suggested model for heavy usage

• 500 lb rated

• Shown with custom stainless steel upgrade available soon.

LivingStep™

About Us

The LivingStep was launched in 2008 by Tailgate Accessories, LLC enhancing accessibility and performance to the entry and exit of the pickup truck's bed.

Originally invented and developed in 2003 by Tom Livingston- entrepreneur and business owner, the LivingStep is a fully tested and patented step manufactured in the USA to automotive industry standards.

It is easily installed and does not require the purchase of a new truck or tailgate.

The LivingStep is promoted by the concept of one moving part, a hardened stainless steel hinge pin not affected by climate conditions.

Why LivingStep? UNIQUE FEATURES

- **4 IN ONE** – Step, Seat, Load extender, and Work surface
- **E-COATED AND POWDER COATED** to add LONGEVITY and PREVENT RUSTING INSIDE and OUT
- **ONE MOVING PART** – HARDENED STAINLESS STEEL HINGE
- **CLIMATE RESISTANT:** Ice, Sand, Snow, Mud
- **FLUSH MOUNT** – does not interfere with work surface or space (TGS- 11 adds features such as handle grips and cup holders)
- **CENTERED** - evenly distributing weight to each cable on tailgate

TGS-11 Surface Mount

- **TRANSFERABLE** from one truck to another
- **NON - SLIP HDPE** (high density polyethylene) plastic molding
- Use of **JACK NUTS** instead of sheet metal screws adding **STRENGTH** - tested to **1200lbs**
