WAKE FLAME SL

WAKE FLAME SXL

WAKE FLAME SL & SXL

This high output underwater light houses up to 18 LEDs with a light output of up to 9,000 Lumens. The Wake Flame SXL is available in multiple colors, as well as in the RGBW (red, green, blue, white) option. The SXL RGBW features our patent pending color rotation technology. This allows your underwater light(s) to constantly alternate colors or for you to select the exact color of your choice.

All Wake Flame Underwater LED Lights are capable of being a master, slave, or stand-alone color changing light system. They work with or without DMX controllers.
