

Superchips Racing Announces **ALL NEW** GM Diesel Racing Tuner is Now Available

Superchips Racing GM Diesel tuner (part no. 2856) is the newest product in a long line of vehicle performance programmers. The racing tuner is specifically designed for high performance racing environments on vehicles with modified free-flowing exhaust systems including drag racing, sled pulling, rock crawling, closed course road and trail racing. Race tuning is available for **2007.5 – 2009 GM 6.6L Duramax LMM powered trucks**.

The racing tuner is easy-to-use and includes up to three high performance tunes and one extreme race tune that require activation through Superchips. The included tunes deliver power gains up to **127 HP and 223 lbs-ft TQ**. More extreme tunes are available via Superchips Internet Update software that deliver up to **151 HP and 266 lbs-ft TQ**.

Additional features include diesel particulate filter (DPF) delete, exhaust gas recirculation (EGR) management, speed limiter adjustment, diagnostic read & clear, and real time performance monitoring for over 20 PIDs, ¼-mile and 0 – 60 times.

Superchips Racing tuning delivers more to-the-wheels power than other popular GM racing tuners all while eliminating common problems found in the other products including an overly sensitive pedal, engine surge and abrupt shifts.

WARNING

WARNING

WARNING

- Do not leave the DPF on the vehicle if using this product to delete DPF regeneration.
- Misuse of this device could lead to a serious accident or even death.
- Before installing, read and comply with all information in the Getting Started guide.

- All DPF Management tuning products are **STRICTLY FOR OFF-ROAD USE ONLY**. According to the EPA Clean Air Act, they are illegal for use on any Federal, State, or Local public highways and illegal use is punishable by the penalties enacted by the mentioned laws. We do not condone illegal use of these products, and an Environmental and Liability waiver must be signed in order to activate any DPF Delete products purchased from Superchips.
