4" ULTIMATE SYSTEM

4" Ultimate System
w/Performance Shocks

OVERVIEW

Our new 4" Ultimate System provides less lift than our 6" RTST[™] system but still allows use of 35" tall tires for street and moderate offroad use. We have developed this system utilizing replacement upper control arms constructed of 1.50" OD .120" thick wall DOM tubing that attaches to heavy duty Fabtech ductile iron steering knuckles. The factory torsion bars remain in the stock position and use new forged adjusting keys to provide the proper amount of lift.

There is no loss of ground clearance with this system as the stock lower control arms, torsion bars and front differential do not need to be relocated.

This 4" Ultimate System will level the stance of the vehicle compared to the factory nose down rake with no change to the rear suspension. For those customers that require a factory nose down appearance an optional 1" rear block kit is available.

FEATURES AND BENEFITS

- Mild lift height of 4" for use of 35" tall tires
- Tubular upper control arms include heavy duty extended range ball joints that provide an additional 2" of travel over stock
- No loss of ground clearance
- No cutting, welding or drilling required for installation
- Optional front Dual Shock System provides increased damping capacity for offroad use
- Allows use of stock 18" & 20" wheels & tires

INSTALLATION & TECH

- Estimated installation time - 2 hrs.
- Amount of holes to drill for installation - 0
- Welding Required - NO
- Driveshaft Modification Required - NO

TIRE AND WHEEL SIZE

- Tire - 35/13.50R18 Wheel - 18x9 w/ 5 3/4" BS w/Trimming
- Tire - 35/13.50R20 Wheel - 20x10 w/ 5 3/4" BS w/Trimming

FABTECH 2011 GM C/K2500HD & C/K3500HD

4" GM System w/Performance Shocks #K1055 (20)(114)

Qty	Part#	Description	UPC	Weight	Jobber	Jobber Ext
